Setting Up the WolfieNet-Secure Connection
For Mac OSX 10.7 (Lion)

**Step 1:** To connect to WolfieNet-Secure without using WolfieNet-Get Connected, click on the Wi-Fi icon in the top right corner and select **WolfieNet-Secure**.
Step 2: You will be prompted for your **NetID and NetID password** (not your computer password).

![Step 2 Image]

Step 3: After entering your credentials, you will be prompted to examine the server certificate that you are about to authenticate, you can just click **CONTINUE**.

![Step 3 Image]
**Step 4:** You will now be connected to **WolfieNet-Secure**. You can check your connection by going to **Open Network Preferences** in the Wi-Fi menu or clicking on System Preferences under the Apple icon.
