**Summary:**
User needs to connect to WolfieNet-Secure on their Apple Devices.

**Prerequisites:**
Iphone/Itouch/Ipad running OS3 and higher.

**Description of the Problem:**
Apple Device won't connect to WolfieNet-Secure.

**Resolution:**
Step 1) Click on Settings and go into Wireless networks, and connect to WolfieNet-Get-Connected.
Step 2) Open up Safari and browse to a webpage. A “Welcome to Stony Brook WI-FI” Page should open up. Select WolfieNet-Secure which should be the middle icon.

Step 3) Click “OK” to a popup explaining how you will need to enter your NetID and NetID password for WolfieNet-Secure.
Step 4) You will be prompted to install the WolfieNet-Secure profile. Click on “Install”.

Step 5) Enter your NetID username and click on “Next”. Then enter your NetID password and click on “Next”. Profile should be installed and then click on “Done”.
Step 6) Go back into your wireless networks and connect to WolfieNet-Secure. Enter your NetID Username and NetID password and click on “Join”.

Step 7) Click on “Accept” to accept Certificate.

Step 8) Open up Safari. You should be able to browse the internet.
**User Expectations:**

User can now connect to WolfieNet-Secure Wireless Network on their Apple Device.
