Summary:
User is attempting to connect to “WolfieNet-Get-Connected” from a Windows 7 or Windows Vista machine.

Prerequisites:
Windows 7 or Windows Vista operating system.

Description of the Problem:
Documentation for what Windows 7 and Windows Vista users can expect to see the first time they try to connect to the “WolfieNet-Get-Connected” SSID.

Resolution:

Connect to WolfieNet-Get-Connected

Open up Internet Browser and click on “WolfieNet-Secure”. 
Accept License Agreement and Click on “Start”

Click On “Run”

When you receive the Security Warning asking if you want to install the “Go Daddy Class 2 Certification Authority,” click “Yes”
Click “Yes” for a second time.

Click “Yes” for a third time.
Click “Yes” for a fourth time.

Enter your NetID and NetID Password and click on “Continue”.

Once connected, you should receive the following speed test page.
Check your wireless networks. You should be now connected to WolfieNet-Secure.

**User Expections:**

User can now successfully connect to the WolfieNet-Secure wireless network.
