Download and Installing the AirNet Client for Windows 7

**Step 1:** Click the **Network icon** in the taskbar.

![Network Icon](image1)

**Step 2:** Connect to **AirNet** under **Wireless Network Connection**.

![Connection Step](image2)

**Step 3:** Open an Internet browser. (Internet Explorer, Firefox, etc.) The AirNet client can be downloaded from either the AirNet welcome page or from Softweb ([https://softweb.cc.stonybrook.edu](https://softweb.cc.stonybrook.edu)). You will need your NetID and NetID password in order to access SoftWeb. Once authenticated, the AirNet client can be found under “**Utilities > Windows AirNet Client**.”

Step 4: Double-click the icon (at the saved location).

Step 5: Click Run if a Security Warning window comes up.

Step 6: Click Yes when it asks if you want to install AirNet.

Step 7: During installation, you will be prompted with this box. Select All Users and for convenient access, check Add a shortcut on the desktop.
Step 8: You have successfully installed AirNet if this window pops up. Enter your NetID in the User name field and your NetID Password in the Password field. Click Connect.

Step 9: You can connect using the shortcut on the desktop in the future.
