Downloading and Installing the AirNet Client for Windows Vista

**Step 1:** Click the **Network icon** in the taskbar.

**Step 2:** Select **AirNet** and click **Connect** to connect to AirNet Wireless.

**Step 3:** Make sure you are **connected** to AirNet.
Step 4: Open an Internet browser. (Internet Explorer, Firefox, etc.) The AirNet client can be downloaded from either the AirNet welcome page or from Softweb (https://softweb.cc.stonybrook.edu). You will need your NetID and NetID password in order to access SoftWeb. Once authenticated, the AirNet client can be found under “Utilities > Windows AirNet Client.”

Step 5: Double-click the icon (at the saved location).

Step 6: Click Run if a Security Warning window comes up.
Step 7: Click Yes when it asks if you want to install AirNet.

Step 8: During installation, you will be prompted with this box. Select All Users and for convenient access, check Add a shortcut on the desktop.

Step 9: You have successfully installed AirNet if this window pops up. Enter your NetID in the User name field and your NetID Password in the Password field. Click Connect.
Step 10: You can connect using the shortcut on the desktop in the future.
