How to Connect to AirNet with iPhone/iPod touch Via VPN (For Full Network Access)

**IMPORTANT** The operating system on your iPhone/iPod touch should be at version 3.0 or higher.

1. Go to **Settings** and select **Wi-Fi**.
2. Select **AirNet** in Wi-Fi Networks.
3. The AirNet captive portal will open. When prompted, enter your NetID and NetID password.
4. Go to your device’s home screen and select **Settings**.
5. Select **General**.
6. Select **Network**.
7. Select **VPN**.
8. Select **Add VPN Configuration**.
9. Select **PPTP** and make sure the fields are filled out as follows:

- **Description:** AirNet VPN
- **Server:** pptp.airnet.stonybrook.edu
- **Account:** Your NetID
- **Password:** Your NetID password

Select **Save**.

10. Switch **VPN** to **ON**. The device should show the following:

Starting ... Authenticating ... Connected

11. Once the VPN shows a running timer, you have connected to AirNet via the VPN.
