Setting Up the WolfieNet-Secure Connection
For Android

Step 1: Click on the Android’s Applications menu.

Step 2: Scroll down to Settings.
Step 3: Click on **Wireless & networks**.

Step 4: Click on the Wi-Fi checkbox to turn it on.
**Step 5:** Click on **Wi-Fi Settings** to choose a wireless network.

**Step 6:** Choose **WolfieNet-Secure** from the wireless network options.
Step 7: Set EAP Method to PEAP and Phase 2 Authentication to MSCHAPv2 and press Connect.

Step 8: Scroll down to Identity and type in your NetID and put your NetID Password in the “Wireless Password” field. Then press Connect.
Step 9: Your Wi-Fi connection will establish itself.

Step 10: Once connected, WolfieNet-Secure will display a “Connected” subtitle.
